

Day 35 (ii) if... else statement :-

syntax :-

```
if (Test Cond) :  
[  
-- statement - 1  
-- statement - 2  
...  
-- statement n  
]  
else :  
[  
-- statement - 11  
-- statement - 12  
...  
-- statement - 1n  
]  
Other statements  
in program
```

Indentation
Block-I

Indentation
Block-II

Explanation:-

=> Here if and else are the keywords.

=> If the Test Cond is True then pvm executes indentation block of statements-I and later executes other statements in program.

=> If the Test Cond is False then pvm executes indentation block of statements-II and later executes other statements in program.

program for accepting whether a given number of +ve or negative or zero.

`n = int(input("Enter a number:"))` # +ve or -ve or zero.

`if (n > 0):`
`print("{} is +ve".format(n))`

`else:`
`if (n < 0):`
`print("{} is -ve".format(n))`

`else:`
`print("{} is zero".format(n))`

`print("program execution completed")` = .

W/O
 ① even or odd +ve.

② Area of circle
 radius must be +ve

③ Area of rectangle
 length breadth
 must be +ve

```
# program for accepting a word and decide whether it is a
vowel word or not.

word = input("Enter a word:")
if ('a' in word.lower() or 'e' in word.lower() or 'i' in word.lower()
    or 'o' in word.lower() or 'u' in word.lower()):
    print("{} is a vowel word".format(word))
else:
    print("{} is not a vowel word".format(word))
